The RENNA™ 450 Side Adjust series rollers, adjustable at full load, are offered in various configurations to suit your sliding door requirements. Extruded, turned composite wheels provide quiet operation and reduced track wear.

Features

- Patented interlocking technology prevents collapse and separation at maximum load
- Precision wheel bearings with rubber end seals
- Industry leading carriage wall thickness
- Offered with extruded, turned composite wheels for smoother operation
- Adjustment screw accessible at both sides
- Certified to the requirements of AAMA 906-21
- Weight capacity 450 lbs per pair at 10000 cycles per AAMA 906-21
- Available for use on vinyl, wood and aluminum

Specifications:

Roller diameter: 1.25"

Maximum door weight: 450 lbs*

Adjustment range: Standard, Inverted & Snap In: 0.36" Extended: 0.26"

*Capable of supporting over 625 lbs with reduced operating cycles
